Board of Director's Report

Performance review

In the first half of 2023, the NAV of Partners Group Global Value SICAV I (EUR) increased by 3.2% on a net basis. The Fund's private equity direct investments were the key performance driver, on the back of strong earnings growth and healthy margins. As of 30 June 2023, the direct equity portfolio recorded an average EBITDA margin of 27.5% and an EBITDA growth of 12.5% over the last twelve months. Among the largest contributors were KinderCare, Idera and Civica.

The valuation of KinderCare, the largest for-profit provider of early childhood education and care services in the US, increased to reflect KinderCare's valuation multiple uplift in line with comparable companies. At the same time, the company recorded robust last 12-month financial performance with year-on-year increases in revenue and EBITDA, mainly attributable to growth in average weekly enrolled students as well as favorable labor efficiencies. Operationally, the number of centers in operation increased as of April 2023, in line with plan, and up from the prior year.

The valuation of Idera, a provider of software solutions for testing, application development and database architecture and management, increased driven by robust financial performance and an uplift in valuation multiple applied in line with comparable companies. The company continued to perform ahead of plan and recorded healthy top line and EBITDA results mainly attributed to its strong inorganic growth, demonstrating Idera's ability to successfully acquire and integrate new businesses that complement its product portfolio.

The valuation of Civica, a UK-based company that provides critical software solutions to the public sector, increased as a result of strong financial performance. Civica continued its track record of uninterrupted growth since inception with positive revenue and EBITDA recorded over the last 12-month period. This was primarily driven by strong organic developments in Civica's core software business supported by growing demand and a healthy customer base. Looking forward, the company remains focused on the planning and execution of its strategic initiatives to further drive its go-to-market strategy.

Investment activity

In the first half of 2023 Partners Group remained highly selective and continued to focus on operational value creation initiatives at portfolio companies and disciplined underwriting. During the reporting period, the Fund completed several new and add-on investments. The largest new ones were Cloudflight, Project Harvest and Breitling.

With respect to private equity direct investments, the Fund invested in Cloudflight, a leading digital transformation services provider in Europe. Cloudflight provides scalable solutions and tailor-made software to help companies digitize their business models, processes, and products. The company's core expertise is in software development for long-term projects, which typically requires deep expertise within fields such as Internet of Things, cloud architecture, machine learning, and artificial intelligence. Cloudflight is well-positioned to benefit from future growth in the digital transformation services and cloud computing markets, driven by multiple industry and technology tailwinds. Partners Group will work with Cloudflight's management on key value creation initiatives including the further build-out of new technical capabilities and vertical expertise.

In March 2023, Fund invested in Project Harvest, representing Partners Group's acquisition of a selected subset of seven high quality buyout funds managed by six leading General Partners. Partners Group acquired the high-quality inflection portfolio from a larger portfolio of over 26 funds at a 10% discount, with an average vintage year of 2018, providing strong NAV uplift potential. Partners Group is an existing investor in six of the seven funds acquired with 100% GP overlap. The portfolio is well diversified across 134 companies, while the largest 20 companies represent only 46% of total NAV with significant exposure to resilient industries such as software, healthcare and goods and services sectors.

In May 2023, Partners Group closed the transaction to increase its equity stake in Breitling, a leading independent Swiss watchmaker. Following the transaction, Partners Group will be the largest shareholder of the company. CVC, Breitling's previous majority shareholder, together with its management team and other co-investors, will remain invested alongside Partners Group. Looking ahead, Partners Group will partner with CVC and Breitling's management to develop the brand into an enduring legacy in the industry while maintaining its neo-luxury edge through its focus on direct-to-consumer sales channels. In 2023, Breitling continues

generating strong revenues and EBITDA growth, primarily driven by key markets, such as Germany, Switzerland and Italy. Moreover, the success of new launches and the ladies' segment helped the company to gain further market share.

Well-diversified portfolio

The Fund remains broadly diversified across regions, industries, and companies. As of end of June 2023, the Fund's regional diversification was as follows: 48% North America, 42% Europe, 8% Asia-Pacific and 2% Rest of World. The Fund focuses on industries and subsectors where growth is underpinned by long-term transformational trends, such as hyper-automation, industrial safety, and neo luxury, with substantial allocations to technology (22%) and healthcare (22%). The Fund is also diversified across more than 500 companies and assets, with the top 10 largest direct investments representing 15.7% of the NAV.

With respect to exposure by transaction type, the allocation to direct investments stood at 69%, the share of primary investments at 17% and secondaries accounted for 14%. The Fund continued to follow its dynamic asset allocation, systematically overweighting investment types which offer attractive relative value. Regarding financing stages, 75% of the portfolio's investments have been made in the buyout sector. 15% of the portfolio is allocated to private debt, which offers attractive total returns at historic highs and inflation protection in the current context of rising base rates, given the floating rate nature of the loans. 4% of the portfolio is invested through primary and secondary investments in venture capital and cash and cash equivalents make up 6% of the portfolio.

With an average maturity of four years and 56% of the current investments made before 2020, the Fund's portfolio provides a unique diversification across vintages, which is a source of regular liquidity and driver of long-term consistent performance. Overall, the portfolio consists of an attractive mix of mature assets and assets in value creation phase with a substantial realization potential. The direct private equity portfolio has minimal near-term maturities, with 65% of its debt maturing in 2028 or later. Moreover, it is well protected against rising rates, as 76% of the investments pay hedged floating rates or fixed rates.

Outlook

Higher interest rates and stubborn inflation in the first half of 2023 confirmed the shift into a new macro regime, ending the era of cheap debt, vast credit availability, global trade integration and a US-led unipolar world. In the near term, the Partners Group considers it likely that the US and Europe will enter into a recession, while inflation and interest rates may remain higher for longer. Mid-term, a new steady state of tepid economic growth and modestly higher inflation and nominal interest rates is anticipated.

In the current macro environment, a proactive and dynamic approach to investment is required to build a new type of defensiveness and drive growth. Partners Group follows an active investing approach across the portfolio, focusing on transforming companies and assets into market leaders through strategic value creation plans. This may entail helping a leading company to adopt new technologies to enhance operational efficiency or reach new markets, as well as working on asset repositioning. Compared to the recent past, Partners Group places greater emphasis on organic growth and real asset transformation. Inorganic platform expansion is still appealing if it can be achieved through cash flow generation instead of expensive debt financing facilities. For new opportunities, Partners Group carries out comprehensive asset testing against adverse economic scenarios and does not compromise on price. Partners Group also continues to place emphasis on assets' pricing power, product differentiation and cash flow generation to ensure margin stability amid lower GDP growth, higher interest rates and elevated wages.

While the current market environment may present some headwinds, Partners Group remains focused on driving value creation in the Fund's existing portfolio companies, while continuing to explore opportunities to realize assets from the Fund's direct portfolio, where value creation objectives have been achieved. Approximately 20 exits and ~EUR 1.3bn of the Fund's NAV are anticipated to realize over the next 18-24 months. Regarding investing activity, Partners Group believes that the current market environment provides attractive investment opportunities for Private equity buyouts, as valuations are readjusting and providing more attractive entry points. Moreover, Partners Group sees attractive opportunities in secondary investments, given that LPs are more willing to accept discounts to generate liquidity and the large volume overhang provides the opportunity to acquire quality portfolios at attractive pricing.

2. Accounting methods

The financial statements are prepared on a going concern basis in accordance with Luxembourg regulations relating to investment funds, including the following significant accounting policies:

2.1 Valuation of investments

Securities which are quoted or dealt in on a stock exchange are valued at the latest available dealing price or the latest available mid-market quotation (being the midpoint between the latest quoted bid and offer prices) on the stock exchange which is normally the principal market for such security.

Investments in unquoted private equity funds (or any funds of private equity funds) and in limited partnerships are initially valued at cost and thereafter by reference to the most recent net asset value as reported by the general partner or manager of the relevant investment as adjusted for subsequent net capital activity and other event to reflect fair value.

The AIFM of the Fund, on the basis of advice received from the Investment Advisor, will make its own estimation of the value of any Direct Investment held by the Fund and will typically not obtain independent valuation of such Direct Investment. The AIFM shall determine prudently and in good faith the estimated realization value of such assets. Mezzanine Direct Investments will initially be valued at cost (face value of loan plus accrued interest, if any) and thereafter typically adjusted for any change, if any, in (i) accrued pay-in-kind interest, in (ii) value of warrants and/or (iii) in the face value of the loans.

In selecting investments, the AIFM has taken into consideration the accounting and valuation basis of the underlying partnerships and direct investments and selects only those investments, which adopt an internationally recognized standard.

In the event that the AIFM determines that the above valuation guidelines are not appropriate in relation to a particular asset of the Fund, then AIFM shall determine prudently and in good faith the fair value of such asset. The Administrator authorised to conclusively rely on such net asset valuations reported by the general partner or manager of the relevant investment, or the AIFM, as the case may be.

Critical accounting estimates and judgments by the AIFM of the Fund

There is significant subjectivity in the valuation of investments in limited partnerships and directly held investments with very little transparent market activity to provide support for fair value levels at which willing buyers and sellers would transact. The estimates and judgments employed therein are therefore continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The AIFM make estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results.

Valuation method

For the valuation of such investments, the AIFM review the latest information provided by underlying partnerships and other business partners, which frequently does not coincide with the valuation date, and applies widely recognized valuation methods to such data such as time of last financing, multiple analysis, discounted cash flow method and third party valuation as well as market prices to estimate a fair value as at the balance sheet date. As part of the fair valuation of such investments the AIFM use observable market and cash flow data to consider and determine the fair values of the underlying investments. The AIFM considers the overall portfolio against observable data and general market developments to determine if the values attributed appear fair based on the current market environment. The AIFM make reasonable efforts to obtain the latest available information from the underlying investment.

As part of the continuous evaluation of the fair value of the underlying unquoted investments the fair value assessment procedures are determined by the AIFM. In addition, the AIFM is also responsible for ensuring that these procedures are adhered to during the assessment of the fair values.

Partners Group Global Value SICAV

Based on an assessment of relevant applicable indicators of fair value, the AIFM estimate the fair values as at the valuation date. Such indicators may include, but are not limited to:

- limited partnership's most recent reporting information including a detailed analysis of underlying company performance and investment transactions with the fund between the latest available fund reporting and the balance sheet date of the Fund;
- review of a direct investment's most recent accounting and cash flow reports and models, including date supplied by both the sponsor and the company and any additional available information between the date of these reports and the balance sheet date of the Fund;
- review of recent transaction prices and merger and acquisition activity for similar direct investments;
- review of the limited partnership's application of generally accepted accounting principles and the valuation method applied for its underlying investments such as discounted cash flow and multiple analysis, which are based on available information;
- review of current market environment and the impact of it on limited partnerships, their investments and the Fund's direct investments.

The variety of valuation bases adopted, quality of management information provided by the underlying partnerships and the lack of liquid markets for the investments held mean that there are inherent difficulties in determining the fair values of these investments that cannot be eliminated. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities, and therefore the amounts realized on the sale of investments, could differ from the fair values reflected in these financial statements and the differences may be significant.

2.2 Conversion of foreign currencies

The Fund maintains its accounting records in Euro (EUR) and its financial statements are expressed in this currency.

All assets and liabilities in currencies other than EUR are translated into this currency at the exchange rates prevailing as at the end of the period.

Income and expenses in currencies other than EUR are translated into EUR at the exchange rates prevailing at the transaction date.

The resulting profits and losses are included in the Statement of operations and changes in net assets.

The prevailing exchange rates as at June 30, 2023 are:

2.3 Realized profit/loss (-) on sale of investments

Realized profit/loss (-) on sale of investments is the difference between the cost of the investment and the sale proceeds. The cost of the investment is defined as the original cost-less capital distributions received.

The capital call transactions for the target funds (primaries and secondaries) are recorded at the date they are due to be paid. Distributions of realized gains of partnerships are recorded as realized profit.

Amounts realized on the sale of directly held investments and limited partnerships may differ from the values reflected in these financial statements and the differences might be significant.

2.4 Unrealized profit/loss (-) on investments

The unrealized gain or loss on investments is calculated as the difference between the cost and the market value of the investment at period end. In accordance with current practices, the changes of unrealized profit/loss at the end of the financial period are accounted for in the Statement of operations and changes in net assets.

2.5 Forward foreign exchange contracts

The unrealized gain or loss on forward foreign exchange contracts is calculated as the difference between the contracted rate and the rate to close out the contract. In accordance with the current practices, the changes of unrealized profit/loss at the end of the financial period are accounted for in the Statement of operations and changes in net assets. Realized profit or loss includes realized gain or loss on forward foreign exchange contracts that have been settled.

2.6 Dividend and interest income

Distributions of ordinary income and interests received are accounted for as Income on investments.

Capital gain distributions are accounted for as income if appropriate based on information provided by general partners.

Interest on bank accounts and interests on investments are accounted for on an accrual basis.

2.7 Transaction costs

Partners Group Global Value SICAV has a private markets portfolio that typically does not separately disclose transaction costs in connection with its investments. It is market standard that transaction costs (if there are any) are generally included in the cost of the investment (in other words as part of the purchase price) and not separately disclosed to the buyer.

Therefore the fund is not in a position to disclose such transaction costs since the information is not available and it is not certain that such transaction costs occurred. Partners Group Global Value SICAV has identified the following expenses as transaction costs in the sense of article 124 of the Law dated July 12, 2013. The amount of the transaction costs per June 30, 2023 is EUR 584.578,47
